## STUDY LINK

The structures below are made up of centimeter cubes.
1.

2nd layer
1st layer

Area of base $=$ $\qquad$ $\mathrm{cm}^{2}$

Volume of first layer $=$ $\qquad$ $\mathrm{cm}^{3}$

Volume of entire cube structure $=$ $\qquad$ $\mathrm{cm}^{3}$
3.

Area of base $=$ $\qquad$ $\mathrm{cm}^{2}$

Volume of first layer $=$ $\qquad$ $\mathrm{cm}^{3}$

Volume of entire cube structure $=$ $\qquad$ $\mathrm{cm}^{3}$
2.

Area of base $=$ $\qquad$ $\mathrm{cm}^{2}$

Volume of first layer $=$ $\qquad$ $\mathrm{cm}^{3}$

Volume of entire cube structure $=$ $\qquad$ $\mathrm{cm}^{3}$
4.

Area of base $=$ $\qquad$ $\mathrm{cm}^{2}$

Volume of first layer $=$ $\qquad$ $\mathrm{cm}^{3}$

Volume of entire cube structure $=$ $\qquad$ $\mathrm{cm}^{3}$

## Practice

5. $\frac{3}{5} * \frac{1}{8}=$ $\qquad$ 6. $3,840 / 4=$ $\qquad$
6. $960 * 4=$ $\qquad$ 8. $\frac{4}{5} * \frac{5}{6}=$ $\qquad$
